I received a call from Joe Dunlop today (Oct. 12th) stating that they have been promised some *interim* funding from their investors that will allow them to complete the remaining BLM/DOGM required reclamation and post required bond. He said they were told it would be available by next week (hopefully by Monday).

I advised Mr. Dunlop that we would be preparing a formal Notice of Agency Action next week, no later than Friday the 19th, to meet the filing deadline for the December 5th hearing. He said he understood and would pass on this information to Mr. Finnegan et. al. He felt pretty certain that the funding would come thru next week.

**Joelle, Please send a copy this email to the mine file? Thanks.**

Mr. Joe Dunlop called today and stated that they anticipated the check into the Division by Friday. I told him that our intention was to go ahead and yank the permit and order the site be reclaimed. I told him to contact Wayne Friday with good news and that if this did not occur by Friday that Monday we would be putting together the letter of Agency Action, ordering them to reclaim.  
Pls File this Joelle
